

**Amendments to the Specification:**

Please replace paragraph [0032] with the following replacement paragraph:

[0032] The electronic part handling device 1 are provided with a housing 2 which is thin and of the shape convenient for grasping. Sleeves 6 (6a and 6b) for respectively holding legs 3 (3a and 3b) are provided in the housing 1. Of the sleeves 6, the upper side sleeve 6a is movable relative to the housing 2 while the lower side sleeve 6b is fixed on the housing 2 to be stationary during operation. The movable sleeve 6a is pivoted on the housing 2 by a supporting shaft or stud 7 to pivot around the supporting shaft 7. The movable sleeve 6a is formed with recesses A and B which serve as manipulation portions to be manipulated or operated by the operator. The manipulation portions A and B are formed to facilitate the manipulation of the movable sleeve 6a for the opening or closing of the legs 3 against biasing force.
